PROFESSIONAL SUMMARY

Computer Science Engineering graduate (2026) seeking an entry-level Software Testing / QA Engineer role. Hands-on with manual testing (functional, regression, UI, positive/negative), defect reporting, SQL data validation, API testing with Postman, and Selenium WebDriver automation using Java. Trained in SDLC/STLC and Agile; completed a three-month web development internship.

TECHNICAL SKILLS

Manual Testing: Functional, Regression, Smoke, Sanity, Integration, Black Box, UI Testing; Test Case Design; Positive/Negative Testing; Boundary Value Analysis; Test Planning and Execution
Test Automation: Selenium WebDriver (Java), Page Object Model, Automated Test Scripts, Regression Automation
Defect Management: Bug Life Cycle, Defect Reporting, Severity and Priority, Retesting, Defect Tracking
API & Database: Postman, REST API Testing, HTTP Methods, JSON, SQL, MySQL, Joins, Aggregations, Data Validation
Programming & Web: Java (Core, OOP), JavaScript, SQL, HTML5, CSS3, Bootstrap
Process & Tools: SDLC, STLC, Agile/Scrum, Git, GitHub, VS Code, Eclipse

PROJECTS

Web Application Selenium Automation Framework *Aug 2026 – Present*
Technologies: Java, Selenium WebDriver, Git

- Building Selenium WebDriver scripts in Java to automate login, form validation, navigation and regression workflows.
- Implementing reusable Page Object Model components, assertions, and positive/negative test cases.
- Practicing test execution, failure analysis and debugging, with scripts version-controlled in Git.

Digital Passbook Generator | (GitHub) *Aug 2025 – Apr 2026*
Technologies: Python, Django, HTML5, CSS3, JavaScript, MySQL

- Worked as Frontend Developer and Manual Tester on a database-driven web application with user authentication and validation.
- Built responsive interfaces using HTML, CSS, Bootstrap and JavaScript, integrated with a Django/MySQL backend.
- Executed functional, positive, negative, UI and regression tests; documented defects and validated data using SQL.

FreezyStock Website – Manual Testing Project | (Visit) *Jan 2026 – Mar 2026*
Focus: Manual, Functional, Regression and UI Testing

- Tested search, login, navigation, categories, filters, collections and asset browsing workflows.
- Designed functional, positive, negative, validation, UI and usability test cases.
- Documented defects with reproduction steps, expected/actual results, severity and priority; performed retesting and regression.

Java ATM Simulation System | (GitHub) *May 2025 – Jun 2025*
Technologies: Java, OOP, Collections, File Handling, Serialization

- Built a Java ATM application with PIN authentication, deposit, withdrawal, balance inquiry and fund transfer, using OOP, collections and exception handling.
- Implemented input validation and account locking after three failed PIN attempts; persisted data using file handling and serialization.
- Tested transaction workflows and error scenarios.

INTERNSHIP

Web Application Development Intern, iBase Electrosoft LLP, Amravati Jun 2025 – Aug 2025
(Internship Certificate)

- Worked on assigned web application development tasks and participated in technical evaluations.
- Debugged and tested application features, gaining exposure to the software development life cycle.
- Used HTML, CSS, JavaScript, React, Node.js and MySQL to complete assigned tasks.

EDUCATION

B.Tech – Computer Science & Engineering Nov 2022 – Jun 2026
R.V.Parankar College of Engineering and Technology, Arvi, Wardha, MH
Affiliated to Rashtrasant Tukadoji Maharaj Nagpur University, Nagpur | CGPA: 6.93/10 (Final Semester SGPA: 8.71/10)

CERTIFICATIONS

- Software Testing – Cyber Success, Pune (View)
- Programming in Java – Infosys Springboard (View)
- Database and SQL – Infosys Springboard (View)
- Learn Java Masterclass (Java 17) – Udemy (View)
